

COLORED PRE-CAST COPING RELEASE

This agreement is between the property owner (buyer) and Pool Company (contractor).

You have selected a colored coping stone for your swimming pool project. We use mineral based concrete dyes and pigments to make the colored pre-cast stone coping. The pre-cast stone coping is custom made and produced specifically for your job based on the color sample you selected and as such, are not returnable.

As with all concrete products, some color variation is to be expected. Colored coping is composed of natural materials and has certain inherent characteristics; color variation and shading are normal; they are not considered defects. The color of cured concrete can vary from color charts or samples due to differences in curing times, weather conditions, and temperature.

Accordingly, the buyer agrees that the colored pre-cast coping cannot be guaranteed for evenness of color and may not be the exact shade of color anticipated. The buyer further understands that the color may fade over time and may from the onset, show streaks, blotchy or mottled appearance.

The buyer has read, understands, and accepts the aforementioned conditions.
